

Environmental Performance Data

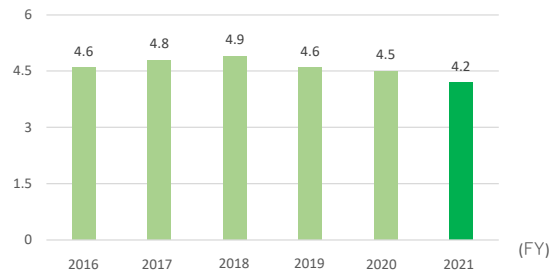

At each plants' Transition in CO₂ emissions volumes, Water usage volume, Transition in total waste volume generated, VOC emissions released are as shown below;

Transition in

CO₂ emissions volumes

In FY2021, CO₂ emissions were lower than in the previous year, mainly due to the continued promotion of improvement activities related to energy conservation.

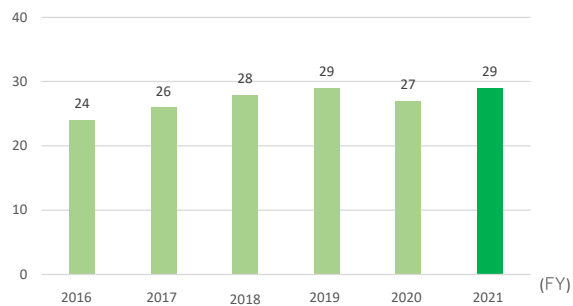

(Ten thousand tons)

Water usage volume

In FY2021, water usage was higher than the previous year due to climatic factors, despite continued promotion of water conservation awareness.

(Ten thousand tons)

Transition in total waste volume generated

In FY2021, we continued our efforts to reduce waste, but production increased, resulting in an increase over the previous year's results.

(Ten thousand tons)

VOC emissions released

In FY2021, VOC emissions were lower than in the previous year due to production volume reductions in related businesses.
